b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.						
Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).						
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The Request for Reconsideration dated 7/5/05 has been considered but are not deemed persuasive for the reasons listed below.

The new matter rejection concerning circulating from the downstream for claims 46-57, 74-67, 81-83, 88-110 has been withdrawn.

Applicant next argues that the new matter rejection with respect to the heat absorber 1104 around the heat generating means 1102 is supported (p.3).

The examiner disagrees. While Figure 1 shows a heat absorber surrounding a heat generating means 1102, it should be noted that nowhere in the Figure or the specification does it recite "covering" the heat generating means.

Applicant next argues that the new matter rejection with respect to the pores in the orifice plate is supported (pp.3-4).

The examiner disagrees. Pores are defined as "a minute opening esp. in an animal or plant; "one by which matter passes through a membrane" (Merriam-Webster's Collegiate Dictionary, p.907, 1997). There appears to be no support in Figure 1 or the specification which discusses pores.

The new matter rejection concerning sheet processing for claims 97-103 has been withdrawn.

The new matter rejection concerning a heater in the upstream size for claim 104 has been withdrawn.

Applicant next argues that Hemsath fails to teach a gas provided on the upside a substrate surface (p.6).

The examiner disagrees. This issue has been addressed in the previous office action.

Art Unit: 1762

Applicant argues that having a heat absorber covering the heat generating means produces a remarkable effect by absorbing radiant light (p.6).

The examiner agrees in part. While it may have a remarkable effect, it is noted that the claims as presently recited do not limit a heat generating means which produces radiant light. Hence, the applicant's arguments are not commensurate in scope with the instant claims. If the applicant were to limit the claims to recite same, the examiner would withdraw this portion of the rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to B. Chen whose telephone number is (571) 272-1417. The examiner can normally be reached on 7:30am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
